

NEW DISCOVERIES MAKE CANCER **EASY TO PREVENT**

By
Dr. John Lubecki, D.C.

Nickel and Mercury

Nickel is one of the most dangerous and toxic metals. It is used routinely to cause cancer in experimental animals. Scientists can then study the tumors in an attempt to find ways of destroying cancer cells.

Mercury is also extremely harmful. Nickel is found in gold crowns and jewelry. It is added to gold to make it harder and more durable. Mercury is mixed with other metals to make amalgam. This amalgam is used to fill cavities in our teeth. These fillings are known as “black” or “silver” fillings. Mercury is unstable and passes into the surrounding tissues. It has a very damaging effect on the thyroid gland and is the main cause of so called hypothyroidism or thyroid weakness. This can cause fatigue, headaches and other problems.

Studies in Europe have shown that persons who have a weak thyroid, due to mercury contamination, are far more likely to develop cancer than those who have a strong thyroid and no mercury.

In Europe there are doctors who refuse to treat patients who have amalgam fillings, gold crowns or wear jewelry which is made of nickel alloys. This is because they are terribly harmful and unless removed it may be difficult or impossible to help a person who is having major health problems. These European doctors insist that all the mercury and nickel is removed before treatment is started. They do so because they have found that when this is done, it is a lot easier to help the patient and sometimes his symptoms may even go away.

I personally had disabling headaches and frequent fainting spells. When the metals were removed from my teeth these symptoms immediately stopped and have never come back.

Many patients have recovered from cancers, M.S., Parkinson’s disease, chronic fatigue and other problems when all the nickel, mercury and chemicals were removed. For instance, we had a patient who was

diagnosed with a fist size tumor in his right lung. He was scheduled to have his lung taken out. When his dental restorations were removed and replaced with composites and he also stopped wearing all metal objects; his tumor disappeared and the surgery was cancelled.

The fact that doctors in this country disregard the possible harmful effects of metals and chemicals is an important reason why we are unable to find a solution to cancer and why cancer often returns following treatments.

The reason why nickel is so dangerous and so important in causing cancer is because it causes profound weakness of the pancreas. If the body is contaminated with nickel to the slightest degree, the production of digestive enzymes by the pancreas drops so much that food is no longer broken down fully and a lot of toxic waste is created.

Dr. William Kelly, the author of several books on cancer, found that he could often help cancer patients by giving them pancreatic digestive enzymes every hour. These enzymes then broke down tumors and many patients made remarkable recoveries.

Only quite recently it has been discovered that metals and chemicals can be neutralized or removed by using a low level laser and a homeopathic imprinter. If a laser is used it neutralizes metals so they are no longer carcinogenic (cancer causing). The imprinter removes chemicals, infections, parasites and radiation. European doctors have found that if the laser and the homeopathic imprinter are used correctly, it is impossible to develop cancer or hardly any other serious conditions.

The fact that the laser and the homeopathic imprinter can remove the main causes of health problems is by far the most important single discovery ever made in health care. The laser removes or neutralizes metals, chiefly nickel and mercury, while the imprinter removes chemicals, all bacteria, viruses, parasites, yeasts, fungi and molds. If the laser and the imprinter are used for prevention every day it is not only impossible to develop cancer but also infections and many other conditions.

Radiation Poisoning and Cancer

You are probably aware that cancer is on the rise and more and more people are being diagnosed with this horrible disease. However, hardly anyone realizes how bad things really are. All attempts to find a way of

controlling cancer have failed. Soon close to fifty percent of people will die of this terrible disease.

So far the main causes of cancer were metals and chemicals. Many authorities believe that now radiation poisoning is even more important and that it has become the main cause of the present cancer epidemic.

The good news is that new discoveries make it simple to remove radiation poisoning. This can be done in just a few seconds by using the homeopathic imprinter. All you have to do is place a homeopathic remedy for radiation on the input plate of the imprinter and your fingers on the output plate and imprint the radiation vibrations on your fingers. When the greatly magnified radiation vibrations pass through your body, they immediately remove or neutralize all traces of radiation in your tissues. After this is done, there is often a marked improvement in health and an increase in strength.

The bad news is that radiation reactivates mercury in fillings and in the tissues around your teeth. This reactivated mercury is believed to be a lot more harmful and cancer causing than before. The only way to neutralize the mercury is to scan your head and upper body with a low level laser. As explained earlier, the laser removes the harmful effects of mercury in just a few minutes. If you want to stay well and prevent cancer, it is important to use a laser daily. We are constantly exposed to mercury. There may be mercury in the air we breathe, sea foods, chewing gums, sweets, vaccinations, etc...

Surprisingly, not all cell phones cause radiation poisoning. Since there is no way that you can tell it is best to stop using cell phones and other electronic devices, especially if you already have cancer.

This is explained in detail in my latest book “NOW WE CAN EASILY END CANCER AND MOST OTHER HEALTH PROBLEMS”. Since we at last clearly understand how to use the imprinter and the laser, we are in a position to not only prevent cancer, but also many other health problems. (Please see our website @ www.LubeckiWellness.com

So far, the main purpose of the treatments for cancer used by medicine (chemo, radiation and surgery) was to kill or remove tumors. Nothing was ever done to discover possible causes of cancer.

It is now a well established fact that thousands of cells turn cancerous in our bodies all the time and our immune system readily destroys these cancer cells as fast as they are formed. Therefore,

alternative cancer treatments concentrate mainly on strengthening the immune system so the body can fight off the cancer and keep it under control.

If the immune system can be strengthened sufficiently, there is often such a marked improvement that it may appear the cancer is gone.

This is because it has not been clearly understood why the cancer had developed and what caused it. As was already explained earlier, it has finally become clear that all cancers are always caused by radiation, metals and chemicals and that these can be removed or neutralized by using the homeopathic imprinter and a low level laser. However, if the laser and the imprinter are not used regularly, the cancer may come back, no matter what else is done. The radiation, the metals and chemicals are far more important in causing a weakness of the immune system than anything else.

Nothing can remove the harmful effects of metals and chemicals as easily and quickly as the laser and the imprinter. Once again, if the low level laser and the imprinter can be used regularly for prevention it has been found that it is impossible to develop cancer.

Ionic Foot Baths and Electrical Stimulators

It has been known for a long time that cancerous tumors are the result of the body being overloaded with wastes and toxins. We know this because the various methods for cleansing the body have helped cancer patients so much that tumors have disappeared.

In his book, “THE CANCER PREVENTION DIET” Michio Kushi writes: “Cancer is the body’s healthy attempt to isolate toxins”. When used together, the ionic foot bath and the electrical stimulator are probably the best way discovered so far for getting rid of contamination. An important added benefit is that they also rapidly reduce swelling and inflammation, which are often the main symptoms of toxicity.

This method is especially effective in the case of brain tumors. As a result, patients with brain tumors and other cancers may improve faster than ever before. For instance, two patients who had been unconscious

for several days, because of large brain tumors, regained consciousness within a few hours when the foot bath and the electrical stimulator were used together with the imprinter and the low level laser.

In general, patients who already have cancer and tumors do a lot better if the foot bath and electrical stimulator are also used.

Scars and Calluses

It has recently become clear that scars and calluses are far more harmful than was ever suspected. It is now known that they are one of the main causes of: allergies, low grade pneumonia, inability to properly metabolize food and chronic weakness of muscles. Treating your scars and calluses daily is one of the most important things you must do if you want to stay well.

What you have to do is rub all your scars, calluses, stretch marks and tattoos firmly every morning and night using a good, natural cream or vitamin A and E oil. You must also use a pumice stone to remove the hard skin from your feet. It is important to do this every day if you want to stay well and prevent health problems. Please see my most recent book "NOW WE CAN EASILY END CANCER AND MOST OTHER HEALTH PROBLEMS".

Diet

This is a vast subject which cannot be covered fully for lack of space. What you eat is very important and plays a leading role in whether you are healthy or not, or whether you recover from a serious problem like cancer. Many patients have got well from advanced cancers when they began juicing, adding raw food to their diet and cleansing. In his book, "A CANCER CURE, RESULTS OF 50 CASES," Dr. Max Gerson quotes the stories of many terminal cancer patients who recovered when they were given freshly made juices every hour and their bodies were detoxified.

In her book, "CANCER DOES NOT SCARE ME ANY MORE" Lorraine Day also recommends a healing, detoxifying diet and relates how she

healed herself of terminal cancer by following a diet consisting of juice enemas and natural foods. Doctors gave her no hope and said she only had hours to live.

In general, it can be said that the foods provided for us by nature are good, while those which have been processed and changed by man are not good, or even harmful.

If you want to recover and get well, you should make a point of reading as many books on nutrition and cancer as possible. One of the best books on this subject is **CANCER FREE by Bill Henderson. This book is full of the latest information on alternative methods of healing cancer and on nutrition for cancer patients.**
